In Memoriam

Dr. Gabriel Pinto de Souza

On January 13th, 2011, Dr. Gabriel Pinto de Souza, a long-time cooperation partner of ours, died unexpectedly at just 53 years of age following a short but very severe illness.

His professional career led him from LACTEC (formerly COPEL – Companhia Paranaense de Energia = Electrical Power Supply Subsidiary of Paraná State) to the

Physics Department of the Universidade Tecnológica Federal do Paraná in Curitiba, Brazil.

He had become a real friend over the years through our intensive cooperation in the field of Dynamic Mechanical Analysis.

We will always hold him in honorable memory.
