

2009 Applications Seminar for Polymers in Industry & Development

Preliminary Program

- 09:00 Doors Open
- 09:30 Welcome Overview of NETZSCH Instruments Product Lines
- 09:45 DSC and TGA methods: Instrument Specifications & Conditions for Reliable Test Results
- 10:30 Break
- 11:00 Quality Control and Failure Analysis by DSC and TGA. Including Thermokinetic Analysis for Optimisation & Precise Predictions of the Curing Process
- 12:15 TG-FTIR and TG-MS
- 12:45 Lunch
- 14:00 Visco-Elastic Properties of Polymers and Composites by DMA
- 14:45 Break
- 15:00 Cross-Linking – even-in-situ! Optimised Curing of Reactive Resins On-Line by DEA
- 15:30 Thermal Conductivity of Polymers, Polymer Melts and Rubbers by LFA
- 16:00 Questions and Close
